

JYOTI KUMARI

Frontend & Full-Stack Developer | React, TypeScript, Node.js

Copenhagen, Denmark | +45 91444729 | switjyoti26@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

I build things end to end — from React and TypeScript interfaces down to the Node.js APIs and databases behind them. On DanskBuddy, a language-exchange platform, I owned the Community Feed, Messaging, and Public Profile features, along with the data model behind them. I've also built backend independently: a Shopping Cart REST API with proper validation and error handling, designed the way a real service would be. I switched into software through HackYourFuture after a non-technical career and kept that same fast-learning habit going since — two Salesforce certifications, SQL, and now Python through IBM SkillsBuild. Comfortable in Git-based, agile team workflows.

TECHNICAL SKILLS

- Frontend: React | TypeScript | JavaScript (ES6+) | Next.js | React Router | Context API | Responsive / Mobile-First Design | Component Architecture | Accessibility Awareness
- Backend & APIs: Node.js | REST API Design & Integration | JSON | Authentication | Validation | Error Handling
- Data: SQL (HackYourFuture coursework) | SOQL (Salesforce) | Data Modeling & Object Relationships | Python (in progress, IBM SkillsBuild)
- Tools & Workflow: Git | GitHub | VS Code | Vite | Agile/Team Collaboration | Salesforce | Azure Fundamentals
- AI & Data: AI-Assisted Development | AI Agents & Chatbots | Retrieval-Augmented Generation (RAG) | Data Analysis & Visualization

PROJECTS

DanskBuddy — Language Exchange Platform | React, TypeScript |

- Built core communication features used by every user: Community Feed, Messaging & Chat, and Public Profile pages.
- Restructured seed data for 15 users into typed, standardized objects — practical data modeling and schema consistency work.
- Extracted shared utility functions reused across Feed, Chat, and Profile; coordinated with teammates in a shared codebase.

Shopping Cart Backend API | TypeScript, Node.js |

- Designed RESTful APIs for product and cart management with TypeScript models, request validation, and error handling.

Event Ticketing App | React, Vite |

- Built and deployed a booking app with search, filtering, pagination, authentication, protected checkout, and cart functionality.

Memory Game | JavaScript |

- Built an interactive memory-matching game with state and win-condition logic — a HackYourFuture fundamentals project.

Space Galactica | Next.js, NASA API |

- Built a space exploration platform integrating NASA APIs, with responsive UI, routing, and API state management.

EDUCATION & TRAINING

HackYourFuture — Frontend Development Program | Completed |

- React, JavaScript, TypeScript, SQL, APIs, Git, and modern frontend engineering.

IBM SkillsBuild — Applied AI Agents, Chatbots & RAG | Completed |

IBM SkillsBuild — Python for Data | In progress |

MBA — Human Resources & Marketing | Marwari College, Ranchi, India | 2014–2016

B.Sc. Information Technology | St. Xavier's College, Ranchi, India | 2010–2013

PROFESSIONAL EXPERIENCE

Mathematics Faculty | Dezine Pathshala, India | 2017–2020

- Delivered mathematics coaching for competitive examinations, including NIFT; designed structured learning materials.

Block Manager | CARE India | 2016–2017

- Managed healthcare project reporting, documentation, and operational tracking with government and development partners.

Manager | Maa Bhambhori Enterprises | 2013–2014

- Managed daily business operations, customer relationships, and employee training and performance tracking.

CERTIFICATIONS

Salesforce Certified Administrator | Salesforce Certified Platform App Builder | Salesforce Platform Foundations | Blue Road Academy Salesforce Specialist Training

LANGUAGES

English (Fluent) | Hindi (Native) | Danish (Basic / Learning)
